TRANSFORMING THE DIGITAL WORKPLACE WITH ASG TECHNOLOGIES

Workspaces

A WORKSPACE FOR THE MODERN ENTERPRISE

Traditional enterprises are facing problems with providing employees with a workspace that fits their needs. The average employee uses more applications, services and sources of information than ever before. Enterprises have to maintain all of the different platforms needed for their employees to be productive while many of these solutions are only helping solve one problem. This causes disconnection and less productivity and impedes on compliance within the organization. In order to decrease the complexity of the end-user experience, enterprises need a solution that can provide flexibility for the end-user and compliance for the organization.

A BETTER APPROACH

Only Workspaces, with a unique combination of capabilities in one solution, can deliver:

1. Single place to work from any device that includes a portal, built-in App Delivery and self-service functionality.
2. A fully customizable workspace for enterprises with further personalization available for end-users, allowing for higher productivity and employee engagement.
3. Full control for regulatory compliance at a fraction of the cost from the competition.

The screenshot displays the ASG Workspaces interface for 'UU Industries'. The user is logged in as 'Sally Eastwood'. The interface is divided into several sections:

- Mail:** A list of recent emails from John Wilson, Herman Irving, Linda Wise, Robert Hurt, Tom Adams, Ashley Frost, and James Faulkner.
- Calendar:** A calendar view for July 7th showing a 'Sales Meeting' at 9:00am and a 'Roadmap Update' at 1:00pm, both via WebEx.
- My Applications:** A grid of application icons including Power Point, Visio, Skype for Business, Excel, Salesforce, and Outlook.
- CRM Search:** A search interface with fields for Company Name or ID, Parent Company Name, Account Executive, Inside Account Executive, Solutions Engineer, Customer Service Rep, and Regional Vice President.
- Help:** A notification that the user's password expired 8 days ago and a message about new updates available for software installed on their devices.
- Opportunities:** A table listing various companies and their associated revenue.
- At Risk Key Accounts:** A table listing companies, the number of issues, and the opportunity value in millions of dollars (\$M).

Company	Product	Revenue
Audi	DW 7.3	\$ 2M
VW	Remote Desk 8	\$ 1,5M
Mercedes	Remote Desk 8	\$ 500K
Daimler	Remote Desk 8	\$ 1,2M
GM	Help Desk 9.5	\$ 700K

Company	# of Issues	Opportunity (\$M)
Lufthansa	12	0.65
Daimler	8	0.8
SCB	8	0.8
Leica	7	0.75
Sony	5	2.1
Thyssen	3	0.65
Minolta	3	0.55

TAILORED DIGITAL WORKPLACE

Enabling a custom workspace for each job role, enterprise and industry, our solution is designed to be fully customizable by partners and personalized by end-users.

Enjoy a personalized workspace with content, apps and services that are relevant to the end-user's job and function. Users can personalize their workspaces' look and feel, create different views of their dashboard and personalize their background.

End users can create custom widgets and content based on web components integrated with Workspaces through APIs to help employees combine platforms and automate their day to day activities. Custom widgets are easily published through a Graphic User Interface (GUI) into the workspace.

IMPROVE EMPLOYEE ENGAGEMENT & PRODUCTIVITY

With Workspaces, employees have everything they need to be engaged and productive in one single place. With a single sign-in, employees can access their cloud services, portal and apps from any business or personal device.

Using a single URL, employees can take their workplace along with them for optimal productivity that supports the Bring Your Own Device (BYOD) environment that many enterprises have adapted.

SINGLE SOLUTION FOR OPTIMAL CONTROL

You have one single solution to handle access to all types of services based on SSO capabilities. Endpoint discovery is built in and encryption is included. Workspaces provides a context-aware and policy driven solution that will allow administrators to control access to content and services based on your company's context and policies. This level of governance enables companies using policy to meet compliance and appropriately control access in a cost-effective way.

COST SAVINGS FOR YOUR ENTERPRISE

With our multitenant delivery method, you can reduce the costs of investing in several deployments and maintaining agents on end-users devices.

Our licensing model is based on one solution with a simple price per user/per month that includes a portal, built-in App Delivery and self-service with a provisioning engine.

With only one solution, your IT administrator will have a much more efficient way to manage and maintain your workplaces.

BENEFITS

- Productivity
- Employee Engagement
- Flexibility
- Governance & Security
- Built-in App Delivery and Self Service
- Governance for Compliance with Regulations
- IT Peace of Mind
- Preserves Prior IT investments
